Mobile Payments Now Available!

You've asked for it and it's now available. Set
up your JCFCU debit card in your mobile wallet
on your smartphone or smartwatch and use that
instead of having to pull out your debit card.

What is a mobile wallet? A mobile wallet is an
App on your mobile device that stores payment
information from a card like your JCFCU debit

card, then allows you to use your device to make purchases. Your
mobile wallet will only work at retailers that accept your device as a
payment method. The major mobile wallets are Apple Pay, Google Pay
and Samsung Pay. The Apps come integrated in your mobile devices.

Also, mobile wallet transactions tend to be quicker than paying with
cash or a card. When ready to pay, open the App, touch your phone to
the compatible reader - it's that easy.

Safety is comparable to using a credit/debit card, and in some
ways, it's safer. To protect yourself, keep the following in mind:

- Use a strong identity verification system: a long PIN, strong
password, or biometric characteristic.
- Use security features that help you find a misplaced device or
that "wipe" a lost or stolen device.
